An Ideal Plant for Bedding or Forcing

FOR OUTDOOR CULTURE. To get best results, remove about six inches of top soil, then dig in well-rotted manure. Level off and cover with an inch or more of sand. Set the bulbs in this and replace the top soil. When freezing begins, cover with thick mulch of leaves or straw. Plant bulbs six inches apart; the tops of bulbs four to five inches underground.

PRICES Double or Single, blue, pink, red and white, each 35c \$4.00 per 12; \$30.00 per hundred.

A Selection of the Finest Darwin Tulips

For many years Holland has been the home of bulbs. The Hollanders have been particularly successful in their propagation and culture. Soil, climate and skill have combined to make the growing of them a fine art, and to that combination the world of beauty owes a great debt. Of all the bulbs, the Tulip is the most popular and the most commonly grown, because of its charm.

No other plant or bulb is so decorative and striking in early Spring as the Tulip. It is suitable for either formal or informal gardens. It may be used among shrubbery, in front of shrubbery, in borders and in beds. It should be planted by the hundreds, and in many colors. It is better taste, however, to keep colors separate when planting in borders or beds.

Directions For Growing

Tulips are planted in the Fall only. Plant in October or November, in rather light, well stirred soil. The tops of the bulbs should be about 3 inches below the surface and planted about 6 inches apart. Before very cold weather, it is wise to mulch with a few inches of dead leaves, straw or grass, removing same very carefully as shoots appear in Spring.

Where Tulips are left in permanent beds, they should be lifted every two years, as the bulbs multiply. Separate the bulbs, grading as to size and shape, and reset. This is done better in October, after the bulb has become entirely dormant. In replanting, use the larger, uniform sizes. The small bulbs may be set by themselves in some corner to mature and get larger. Tulips may be perpetuated in this manner.

For the most charming result no less than six of a color should be planted.
 Darwin Tulips can be furnished in the following colors: Pink, Red, Maroon, Purple, White, Brown or Yellow. Order should be by color.
 Prices \$1.20 per doz., \$4.00 for 50 or \$8.00 per 100

CROCUS

PRICES

Mixed Colors 50c per doz. \$3.00 per 100
\$25.00 per 1,000

Bulbs Required for A Round Bed
